EDUCATION

Georgia Institute of Technology (GT), Atlanta, GA December 2027
Bachelor of Science, Major in Computer Science, Minor in Industrial Design GPA: 3.64/4.00

- **Concentration:** Artificial Intelligence & Media

EXPERIENCE

Technical Lead Instructor @ iCode Augusta May 2026 - Present

- Building Ansible-based configuration management to remotely manage a fleet of Windows machines via WinRM, automating GPO and registry-level policy enforcement
- Set up and administered Veyon classroom management software; produced internal technical documentation (Python, ReportLab) for deployment and configuration
- Implemented SMB shared folders on a Synology NAS for student project storage, following the team's storage architecture
- Advised on authentication strategy (key-based vs. logon) for AD integration with classroom management software
- Developed instructor onboarding and operational processes, streamlining integration into the business model and improving team efficiency

Full Stack Developer @ WebDev GT (Software Engineering) August 2024 - May 2025

- Integrated the OpenAI ChatGPT API to parse natural language prompts into music playback, queue management, and AI lo-fi generation for a real-time chat app
- Engineered the backend with 8 teammates, architecting live message handling for 100+ concurrent messages (Node, Express, Next.js, MongoDB)
- Developed responsive React components for the landing page, authentication flow, and a journal dashboard rendering user entries from RESTful endpoints
- Collaborated in two-week Agile sprints using Git-based version control and branch management, coordinating feature delivery across backend and frontend teams

PROJECTS

Recruitment Website – Full Stack Dev & Product Owner August 2025 - December 2025

- Built full-stack features in Django including geolocation-based candidate/job matching, map-based radius filtering, a multistage applicant pipeline, and role based access for recruiters, job seekers, and admins
- Designed and implemented the data models and views underlying core platform features; job search with multi-field filtering, candidate profiles, and CSV data export for admin reporting
- Owned the product backlog as a Product Owner, managing 20+ user stories across 3 sprints and prioritizing scope with a client-facing TA in weekly Microsoft Teams calls and demos

SpeechWrite – Speech Recognition Bias Analysis February 2026

- Built a tool to measure bias in automatic speech recognition across 5+ English accent groups using Mozilla Common Voice dataset and OpenAI Whisper API
- Converted transcripts to phonemes and quantified substitutions/deletions, revealing 2-5x higher error rates for non-Western accents
- Generated interactive visualizations (heatmaps, charts) using Python and Claude-assisted development, highlighting high-error phonemes and accent groups

GTGuessr – Location Guessing Web Game August 2025 - December 2025

- Created GeoGuessr-inspired web application for Georgia Tech using EXIF data and the Google Maps API
- Processed EXIF data for image coordinates and implemented full-stack features with Django
- Followed Agile methodologies with 4 team members to plan and execute the project

Personal Portfolio Site July 2026

- Designed and deployed a personal portfolio site using React and Vercel with AI-assisted workflows (Claude, Copilot) to accelerate implementation

TECHNICAL SKILLS

Languages and Tools: Java, Python, JavaScript (Node, Express, React), HTML, CSS, MongoDB, Git, Claude, AI, Agile/Scrum,
Coursework: Data Structures & Algorithms, Object-Oriented Programming, Design&Analysis of Algorithms, Computer Architecture, Artificial Intelligence, Computer Graphics
Language: Fluent in *English* and *Mandarin*
